The Status of Claims

Claims 1-10 are pending.

Claims 1-10 have been rejected.

DETAILED ACTION

Priority

1. None.

Drawings

2. The drawings filed on 6/24//2003 are objected by the examiner because figs 1, 1a, and 2-6 are generally unclear as to the numbers ,letters, uneven lines ,and labels on the axes.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-4, and 6-9, the phrase “polymorphic Form A” is recited. This expression is vague and indefinite. The specific PXRD pattern of polymorphic Form A is needed to identify the specific crystalline Form A uniquely different from the other polymorphic forms because the x-ray pattern of a pure crystalline substance can be considered as a “fingerprint” with each crystalline material having within limits, a unique diffraction pattern; furthermore, there are other characteristics to be used in order to distinguish the polymorphic Form A further from the other polymorphic forms, such as bioavailability, solubility, dissolution rate, chemical and physical stability, melting point, color, filterability, density, and flow properties. In addition, the polymorphs are further characterized by other analytical techniques such as differential scanning calorimetry, hot stage optical microscopy, and Raman and infrared spectroscopy. The above techniques are essential tools to be used for identifying “polymorphic Form A” clearly; and it is up to applicants to select which critical parameters may be used so as to establish the unique “polymorphic Form A.”

In claims 1 and 6, the phrase “other polymorphic forms” is recited. This is vague and indefinite because the skilled artisan in the art may wonder what other forms of polymorphs might have been present in the predominant polymorphic Form A. Therefore, an appropriate correction is required.

In claims 2 and 7, the phrase “other polymorphs” is recited. This is vague and indefinite because the skilled artisan in the art may wonder what other forms of

Art Unit: 1625

polymorphs might have been present in the predominant polymorphic Form A.

Therefore, an appropriate correction is required.

In claims 3 , 5, 8 and 10, the term “ substantially” is recited. This is vague and indefinite because the skilled artisan in the art may wonder what is meant by exhibiting “ substantially” a PXRD pattern; for example, it may mean that the PXRD pattern is substantially clear or the representative PXRD pattern is good enough to be distinguished from other PXRD patterns. This expression is uncertain as to how much the representative PXRD pattern has been revealed in the X-ray diffraction. Therefore, an appropriate correction is required.
